

## Director, Consulting – Angels Santé

Corinne Marsolier has over 20 years of experience in industry-scale IT-based innovation, mostly focusing on the healthcare and life sciences sectors. As a member of Business Angels associations in France and the UK and judge in MassChallenge start-up incubator, she is involved in scouting for investment opportunities and supporting European start-ups.

In her previous role at Cisco, she led Consulting Services engagements for the healthcare and life sciences practices and developed innovative solutions on telehealth, remote monitoring and data analytics to open new markets in Europe.

She also acted as a trusted advisor on Information Strategies and run innovation workshops for public sector and private healthcare stakeholders, service providers, life sciences and private insurance companies.

She has published white papers on 'Connected Health' and has been invited as a jury member in the HULT Prize competition on social entrepreneurship – sponsored by the Clinton Global Initiative. She is a visiting lecturer at Pierre et Marie Curie University on ehealth and big data and a member of the selection committee for the EDF Pulse Awards 2017 (focusing on 'smart health').

Earlier in her career at Cisco, she worked in different functions including sales & marketing, customer advocacy - to drive 200% growth year to year in networking sales.

Corinne holds a Masters degree in Electrical Engineering (SUPELEC, Paris) and a BS in Economics (Sorbonne, Paris). She has worked in London for 13 years and is now based in Paris.
